

Scottish Equine Breeders Association

(Under the auspices of Scottish Equestrian Association)

Management of the Young Horse from Weaning to Work

Conference Suite, Oatridge College, Ecclesmachan,
West Lothian

Saturday 16th February 2008

In February 2006, of the Scottish Equine Breeders Association Breeding Day demonstrated the advantages of modern breeding practices to owners of mares and stallions. In 2007, SEBA progressed to the next stage in the natural cycle by addressing medical problems at foaling, and of the newborn foal, and the older foal through to weaning and of youngstock. In 2008 the management of the young horse from weaning into work will be addressed.
